R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
library(drake)
head(readd(data))
```

```
##        country year       pop continent lifeExp gdpPercap lnLifeExp

Showing Coefficients

Table 1: Table 1. Summary of statistics

	Intercept	GDP per capita slope	Year slope
Africa	-5.414	0.087	0.004
Americas	-5.248	0.087	0.004
Asia	-5.285	0.087	0.004
Europe	-5.197	0.087	0.004
Oceania	-5.204	0.087	0.004

Including Plots

You can also embed plots, for example:

Whole time series

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
